

An ISO 9001 : 2008 Company

## *Product Facts*

### **BIO TREAT 9010 Biocide**

#### **APPLICATION**

**BIO TREAT 9010** is a powerful industrial biocide used in cooling water treatment for controlling microbial growth in cooling towers viz bacteria, fungi, and algae, which can cause biofouling and corrosion. The formulation contains dispersing agents to enhance the action of the biocide.

#### **PRODUCT DATA**

Appearance : liquid

Specific Gravity : 1.0 - 1.2

#### **FEATURES**

- Ready to use Liquid
- Easy to handle and feed

#### **DOSAGE**

**BIO TREAT 9010** can be added to the tower sump or to any other convenient point in the system. The dosage and frequency of addition depends upon the severity of fouling. The recommended dose is once in week. The frequency of dosing depends upon the severity of problems, type of cooling tower etc. For best results, it is suggested to be added in the evening after sunset and give blow down next day.

#### **HANDLING**

Keep the container closed when not in use. The Product should not be swallowed and prolonged contact with the skin should be avoided. Should it come in contact with the eyes, flush with clean cold water and get prompt medical attention.
